

**D) MAINTENANCE AND PERIODIC INSPECTION
TO ENSURE CORRECT OPERATIONAL
EFFICIENCY:**

- Make sure that the red LED flashes, thus meaning that the device is working correctly;
- Press the “TEST” button for a few seconds: the device should emit a sharp and continuous acoustic signal, thus meaning that the device is working properly;
- Keep the device casing clean and free from dust and dirt at all times;
- To clean the device, you are recommended to use cotton wool soaked in red spirit (ethyl alcohol) or a damp cloth.

E) WARNINGS:

- Do not install the device in rooms classified with the risk of explosion, in direct contact with aggressive chemicals and/or dripping liquids;
- Do not leave the device at the reach of children;
- Do not open up the device to access its interior parts;
- Do not use any kind of solvents to clean the device.

**THIS DEVICE DOES NOT DISTURB
PERSONS OR PETS**

ULTRASONIC RAT REPELLENT US2004/U

USE AND MAINTENANCE INSTRUCTION MANUAL

Via Atene, 5

41049 Sassuolo (MO) - ITALY

Tel.: ++39 0536 808170 Fax: ++39 0536 814161

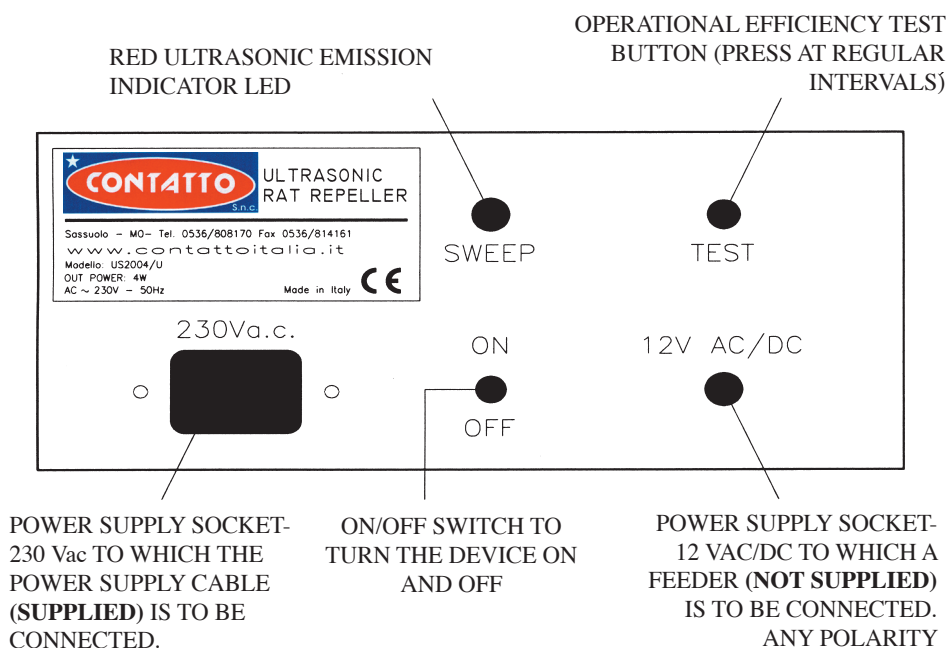

www.contattoitalia.it

E-mail: contatto@contattoitalia.it

A) PACK CONTENTS:

- no. 01 ultrasonic rat repellent mod. US2004/U;
- no. 01 power supply cable 230 Vca;
- no. 01 aluminium wall-mounting bracket;
- no. 01 guarantee sheet;
- no. 01 illustrative sheet of the device;
- no. 01 use and maintenance instruction manual.

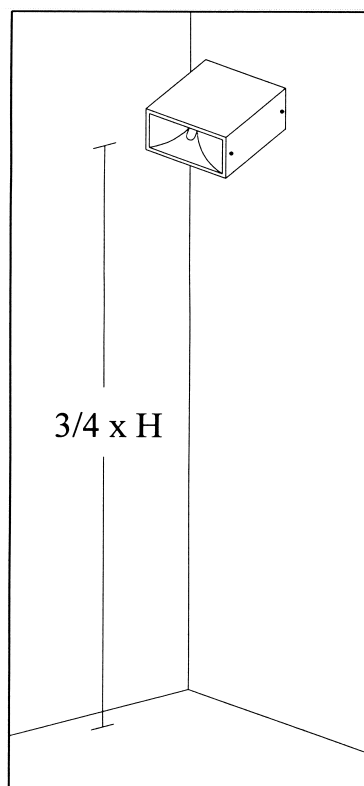

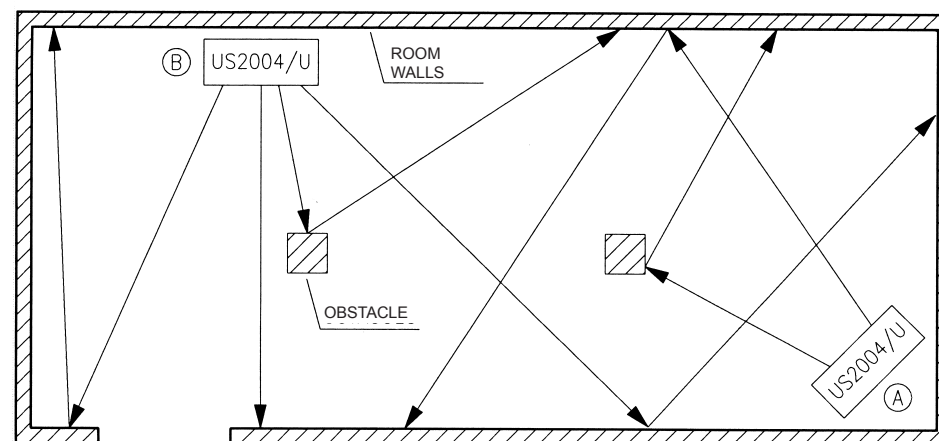

B) POWER SUPPLY AND CONTROLS:

NOTE: The device can be powered either through the 230 Vac socket or through the 12 Vac/dc socket.

If you wish to power the device through a 12 Vac/dc source, you must consider an input power of 5W (feeder 230/12 VAC – min. 500mA).

C) HOW TO INSTALL:

The picture above illustrates an example of how to install the rat repellent device with plan view of a typical room: the devices must be turned at an angle of 45° if installed in a corner (A) or they must be parallel to the wall if they are installed horizontally on the wall (B), with the trumpet facing inside the room.

The picture on the left shows an example of how to install the rat repellent, seen from the front: the devices must be installed at $\frac{3}{4}$ the total height of the room.

Never rest the rat repellent on the floor: obstacles would prevent the signal from being spread ideally.
